

Emma Hoolin Appeal

My name is Emma and I am four years old. In February 2011 I was diagnosed with HIGH RISK NEUROBLASTOMA, a form of CANCER that mainly affects children my age.

I have been going to Manchester Royal Children's hospital for aggressive treatment since February 2011, the course of the treatment ends in October, then I will need a further six months of immunotherapy.

To have the best chance of survival I need to have treatment in the U.S.A. costing £211,000, more if any extra treatment is needed. My family is trying to raise the money by any means. **Can you help me?**
